## FICA RATES AND ADDITIONAL MEDICARE TAX

The rate for the employee portion of Social Security tax is 6.2%, and the maximum earned income it applies to is \$147,000, while the Medicare rate is 1.45% and applies to all earned income.

Self-employed individuals pay both the employee and employer portions, but get a deduction for the employer portion.

Cash wages totaling \$2,400 or more to a household employee are also subject to FICA taxes.

An additional 0.9% Medicare tax applies to FICA wages and self-employment income exceeding \$200,000 (singles and heads of households), \$250,000 (joint filers) or \$125,000 (separate filers).

Employers must withhold the additional Medicare tax beginning in the pay period when wages exceed \$200,000 for the calendar year, without regard to an employee's filing status.

## CAPITAL GAINS TAX RATES

Short-term gain (assets held 12 months or less)	37%
Long-term gain (generally assets held more than 12 months)	15% or 20% <sup>2</sup>
Long-term gain on collectibles	28%
Long-term gain attributable to certain depreciation recapture	25%
Gain on qualified small business stock held more than 5 years	14% <sup>3</sup>
Most long-term gain that would be taxed at 12% or less based on the taxpayer's ordinary-income rate	0%

<sup>1</sup> The 3.8% net investment income tax applies to net investment income to the extent that modified adjusted gross income (MAGI) exceeds \$200,000 (singles and heads of households), \$250,000 (joint filers) or \$125,000 (separate filers).
